The Three Relativities

special relativity	general relativity	modular relativity
invariant: c	invariant: G	invariant: beta_TGL
299792458 m/s	*6.67430e-11 m^3/kg/s^2*	*0.012031300400803142 (= alpha * sqrt(e))*
denies:	denies:	denies:
absolute inertial reference frame	absolute gravitational reference frame	absolute purity reference state (Tr(rho^2) = 1)
Einstein 1905	*Einstein 1915*	*Miguel L.A.R. 2025-2026*

Modular relativity (beta_TGL) is the only one with zero free parameters:
*the invariant is DERIVED from already-known quantities (alpha * sqrt(e)).*
